DETAILED ACTION

Claims 1-8 are pending and subject to restriction.

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I, claim(s) 1 and 2, drawn to an antimicrobial agent produced by *S. salivarius*, classified in Class 424, subclass 115, for example.

Group II, claim(s) 3, drawn to a purified fraction comprising SEQ ID. 2 and 3, classified in Class 530, subclass 324, for example.

Group III, claim(s) 4, drawn to a purified fraction of an antimicrobial agent, classified in Class 530, subclass 300, for example.

Group IV, claim(s) 8, drawn to DNA sequence, classified in Class 536, subclass 23.7, for example.

Claims 5-7 reciting an intended use for various products of groups I-III will be examined depending on the product elected for examination.

Each of the compositions of groups I-IV is directed to a separate and distinct invention and these groups are restrictable because they are distinct compositions. For example, a composition A may not be restricted from compositions A+B, or from A+B+C, or from A+B+C+D as these form a tree of further limitations. However, compositions A+B and A+C and A+D, etc. are distinct compositions and may be properly restricted.

The compositions of the various groups would be expected to have distinct morphological, functional and physiological properties as evidenced by divergent classification, process of making and process of using.

The several inventions above are independent and distinct, each from the other as they have acquired a separate status in the art and require independent searches, particularly with regard to the literature searches. Clearly, a reference which would anticipate one of the above groups would not necessarily anticipate or even make obvious any of the others.

An undue burden would ensue from the examination of multiple compositions which have distinct sources, steps and degrees of purification and properties. Burden lies not only in the search of US Patents, but in the search for literature and foreign patents and examination of

the claim language and specification for compliance with the statutes concerning new matter, distinctness and scope of enablement.

For these reasons restriction for examination purposes is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
